

Smart Callback for Android

Step by step instructions for Smart Callback install for Android from Play Store

First we will need to connect our mobile phone with the internet with WIFI or GPRS/3G

Make sure you have connected to the internet mobile phone and then search for the application Play Store with icon like this

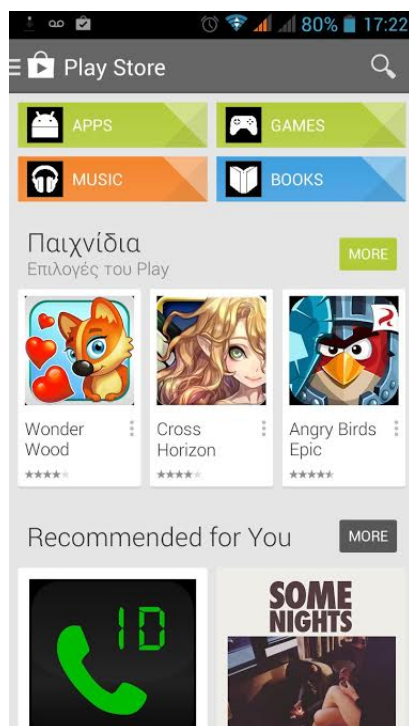

Open the application Play Store , The application will ask for a gmail account if you have a gmail account enter the log in details to get access to the application store, if you don't have you can use our demo account to help you install the application without creating a gmail account

Demo gmail

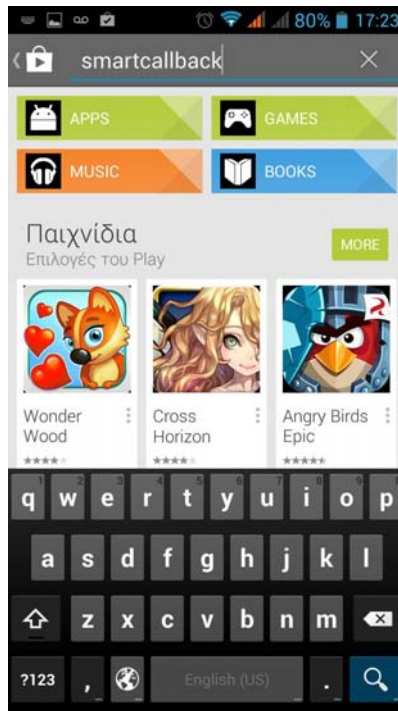

Username: psgrgr@gmail.com

Password: aaaaqqqq

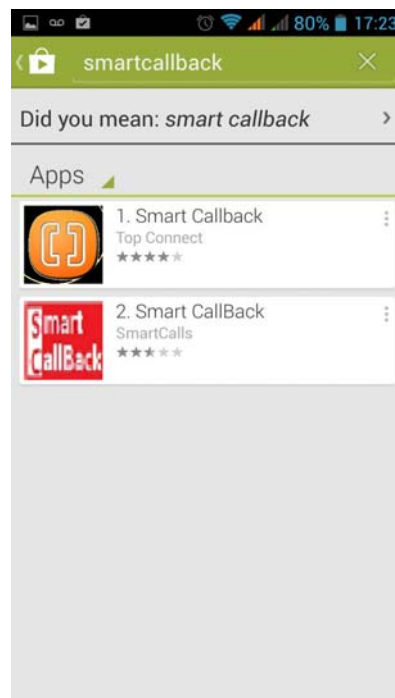

1) After log in you must see the screen as shown bellow

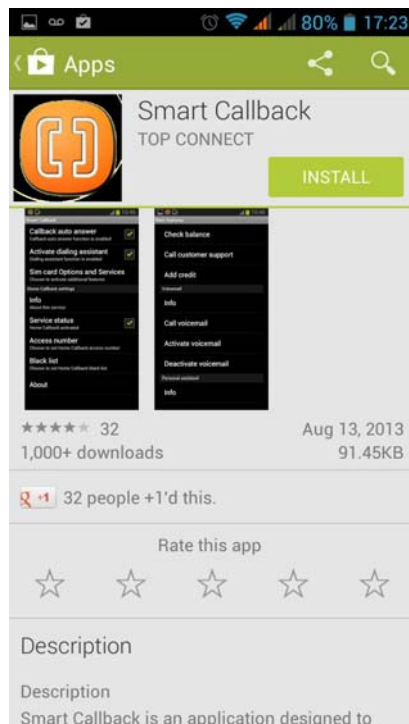

2) Click on the top right corner to search for Smart Callback

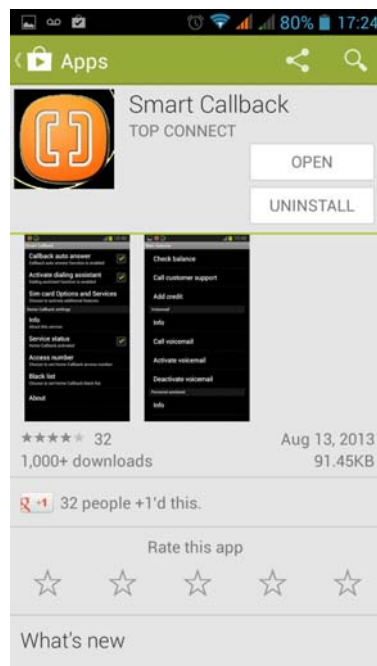

3) A field to write and the keyboard will appear, please write smart callback to find the application

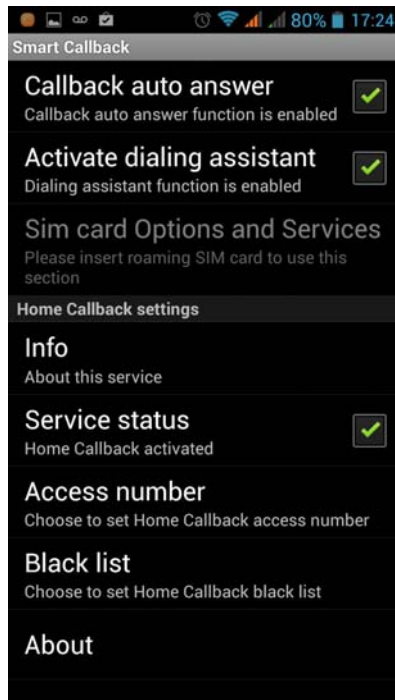

4) Click on the first application with orange logo and name Smart Callback

5) Click at install button

6) After successful installation click open , and you will see the next image.

You are ready to use Smart callback application for Android. From now on all outgoing calls will be completed without callback procedure.
